Dear Woody,

An update on the Waterclave (water purification system) we utilize in both our offices, now we have run almost 2 YEARS in our new office without ever needing to spend 1 minute flushing, purging, cleaning, sterilizing our dental unit water lines DUWL. The Waterclave system has met and blown away the ADA Guidelines on DUWL. Because we don't need to run any DUWL chemical to kill bacteria we don't expose our patients to any trace of chemical or residual endotoxins, just pure bacteria free water.

The Veterans' Administration with Dallas, Texas and Southern Illinois University School of Dental Medicine now are using the Waterclave. We love it even more each day.

Sincerely,

Dr. John F. Blattner, M.S.G.D., D.M.D.
