DALLAS VA MEDICAL CENTER OPENS NEW DENTAL CLINIC

DALLAS – Last renovated in the 1970s, Dallas VA Medical Center hosted an Open House recently for its new Dental Clinic. The new clinic features state-of-the-art equipment, including WaterClave water purification system, digital radiography and Conex sterilization system as well as 12 dental operatories, 3 oral surgery operatories, dental laboratory and spacious waiting area. Dental clinic handled over 15,000 patient visits in FY 02, and providers hope these enhancements will accommodate more patients in a much more esthetically pleasing environment.
